

1

GamesChart ranks the most popular Flash games on the web. Developers have the option to display the charts and generate revenue from out-bound clicks to sponsored sites.

Step 1: **Download**

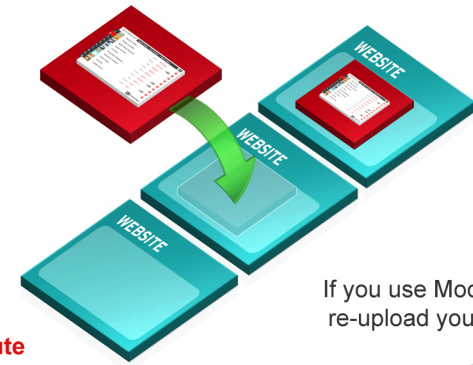

2

To participate, simply implement the GamesChart API within your code OR drag the component direct to the stage. This tracks the number of plays.

Step 2: **Implement**

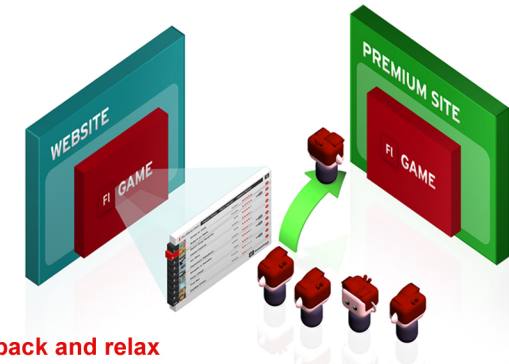

3

Step 3: **Distribute**

If you use Mochi, you could re-upload your game pack.

4

Step 4: **Sit back and relax**

5

Earn revenue every time a Player clicks on the charts powered by the GamesChart API.

Earn in conjunction with any other existing APIs you use. e.g. Mochiads and CPM Star

Step 5: **Earn**

Publishers bid on games positioned in the chart. Players who click on games featured within the chart will be taken to the sponsors site to play the game.

You earn money by promoting content your Gamers will love- **NO annoying ads!**
